DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of wood, carbonate and silane in the reply filed on 6//05/06 is acknowledged.

It is noted that the applicants stated that claims 1, 2, 7, 8, 13-22 and 29 are readable on the elected species. The examiner disagrees with the applicants with respect to the elected specie of silicon –containing material because claims 15-19 and 21-22 recite different specific silicon containing material. It appears that the applicants either did not properly elected a single claimed specie of the silicon-containing material or claims 15-19 and 21-22 are not readable on the elected specie.

It is also noted that the specie "a silane" can be interpreted a s a genus to all other specifically claimed silicon - containing materials and that the applicants intended to elect all the specifically claimed silicon containing materials. Such is not an election of single specie.

Thereby, the examiner requests election of a single specie of the siliconcontaining material.

The claims recite a silane (claim 14) and an alkoxy functional silane (claim 16) as geniuses. The election between these is requiested.

If the applicants elect a silane, than the election of the specific claimed specie of the claimed silane is requested.

If the applicants elect an alkoxy functional silane, than election of a single specie of the claimed alkoxy functional silane is requested.
